

HOW GENETIC TESTING WORKS

1

Work with your clinician to decide if genetic testing is right for you

2

Your clinician can then determine which set of genes to test for

3

Submit a blood or saliva sample at your clinician's office or even from home

4

Receive your results and discuss them with your clinician

5

If you test positive, easily share your results with your family

SIMPLE BILLING, NO SURPRISES

WITHIN THE UNITED STATES

INSURANCE

Invitae will work directly with your insurance company to coordinate coverage and payment. Regardless of whether our laboratory is in-network or out-of-network with your insurance provider, Invitae is committed to making genetic testing affordable. Typically patients pay no more than \$100 out of pocket for one of our tests. If you receive a bill for more than \$100, please call us at 800-436-3037 to discuss payment options.

PATIENT PAY

You have the option to pay \$475 upfront before testing begins. Your clinician must place the order online and provide your e-mail address so we can send you a link to pay online using a credit card.

MEDICARE & FINANCIAL ASSISTANCE

Medicare beneficiaries may be eligible for Invitae testing when specific criteria are met. In addition, Invitae may be able to offer testing at limited or no expense to those who qualify for need-based assistance.

For further information, please contact Client Services at clientservices@invitae.com or 800-436-3037.

OUTSIDE THE UNITED STATES

PATIENT PAY

You have the option to pay \$475 upfront before testing begins. Your clinician must place the order online and provide your e-mail address so we can send you a link to pay online using a credit card.

INSTITUTIONAL BILLING

Invitae will work with your institution to set up a contract if one is not already in place.

For complete billing information, please visit www.invitae.com/billing.

INVITAE

Genetic testing, simplified

WHAT IS GENETIC TESTING?

Genetic testing analyzes your genes, which are the instructions encoded in your DNA. Your genes help determine your hair and eye color, height, and other physical traits that make you who you are. Genetic testing looks for variations in your genes that can lead to disease.

WHAT CAN GENETIC TESTING DO FOR ME?

Genetic testing can help identify and manage an existing hereditary condition, provide insight into unexplained symptoms, and gauge the risk of developing a condition that runs in your family.

WHAT CAN GENETIC TESTING DO FOR MY FAMILY?

If you receive a positive test result, it may have implications not only for you, but your family. Other eligible family members at risk for the same genetic disease have the option to get tested at no additional charge within 90 days.

KNOWLEDGE IS POWER

Genetic conditions shouldn't be a mystery. If you have a diagnosed genetic condition in your family, a genetic test can help you understand your individual risk.

“

DNA sequencing used to seem like a futuristic science. We now know it is available here and now. And it brings our family and many others an understanding of our bodies, a better knowledge of how to deal with and even prevent diseases, and a hope for a healthier future for generations to come.

DEBBI CROWDER, patient

”

WHY INVITAE?

Invitae offers more than just a high quality test. We make sure the entire genetic testing process goes smoothly. We offer panel testing for oncology, cardiology, neurology, pediatrics, and rare diseases—and are committed to delivering high-quality, affordable testing, to everyone who can benefit from it.

SUPPORT EVERY STEP OF THE WAY

At Invitae, we believe in the importance of understanding what your genetic information means for you and for your family members. Our services include:

- Results within 10–21 calendar days (14 days on average)
- Online portal with resources and helpful tools
- Help with insurance and the billing process
