

Blue Shield of California names Invitae preferred provider for HBOC testing

Blue Shield of California is committed to providing access to high-quality healthcare at an affordable price. **Invitae is pleased to announce it is now one of Blue Shield of California's preferred in-network laboratories for Hereditary Breast and Ovarian Cancer (HBOC) and Lynch syndrome testing.**

Invitae's HBOC contracted terms with Blue Shield of California include:

- No pre-authorization required for BRCA1/BRCA2 tests
- One-page Statement of Medical Necessity accepted in lieu of medical records

A San Francisco-based, CAP-accredited and CLIA-certified company, Invitae offers clinical-grade oncology genetic testing that helps confirm diagnoses and assess hereditary cancers. Invitae's renowned team of medical and genetics experts is led by Chief Medical Officer Dr. Robert Nussbaum, MD, a former UCSF faculty member with more than 30 years of experience in medical genetics.

Invitae's testing delivers high quality, fast turnaround time, and a low price. We provide:

QUALITY | A commitment to quality testing

- Invitae's >1000 patient peer-reviewed study, published in the *Journal of Molecular Diagnostics*, shows equivalence to established standards
- Highly automated laboratory coupled with custom informatics ensures high-quality results
- Evidence-based classification system enables reproducible variant reporting in line with ACMG guidelines

CONTENT | Broad, actionable test menu

- Order from the broadest oncology menu available, including all commonly tested genes and variants, with testing options ranging from 1 to 79 genes
- Design your own test or order a curated panel; if you don't get the answers you need, re-requisition more genes within the original clinical area for no additional charge within 90 days
- Testing options include panels entirely comprised of genes that meet clinical practice guidelines

MEDICAL RESPONSIBILITY | Dedication to responsible medicine

- Licensed, experienced, and board-certified genetic counselors are available to help your patients understand the genetic testing process and their genetic test results
- Invitae's >1000 patient, peer-reviewed study in *JAMA Oncology* demonstrates the clinical utility of panel testing in hereditary breast and ovarian cancer

PRICE | Simple pricing. Simple billing. No surprises.

- Invitae charges the same low price for any genetic test—including re-requisition—within a single clinical area, regardless of the number of genes ordered
- Clinical Support Services are provided at no additional charge to help you order the right test for your patient and guide you through results interpretation and management
