

## Together, we can connect patients to the right treatments faster

Programs to accelerate diagnosis and inform next steps

Making the highest-quality genetic testing accessible to patients and their clinicians is at the core of Invitae's mission. Our test menu is one of the broadest in the industry, including panel testing for thousands of genes as well as the ability to quickly create custom panels.

Over **1,000,000** people tested

Over **80** biopharma programs

More than **15** sponsored testing programs

## Innovative programs for faster diagnosis

Customizable programs to accelerate diagnosis, inform next steps, and help bring new therapies to market sooner

### Sponsored testing programs

Reduce time to an accurate diagnosis and inform next steps for clinicians and patients, such as clinical trials or treatments. Patients who meet eligibility criteria receive testing at no charge.

### Clinical trial recruitment

By leveraging our extensive global network we can notify clinicians and patients of relevant clinical trials and accelerate trial recruitment.

### Clinical trial testing

High-quality NGS diagnostic testing enables efficient execution of global clinical trials.

### Real-world data insights

De-identified data provide insights into disease prevalence and the diagnostic journey.

Learn more about our different partnership models at [www.invitae.com/biopharma](https://www.invitae.com/biopharma) or contact us at [partners@invitae.com](mailto:partners@invitae.com)

Our unique Detect sponsored testing programs are rapidly increasing access to genetic testing:

Detect programs are offered in clinical areas where genetic testing has high clinical utility but is underutilized

Programs have broad criteria, increasing access to testing for more patients

Programs are co-promoted by the sponsors and Invitae

Real-world data insights and actionable clinician contact information to inform patient next steps

Cardiomyopathy and Arrhythmia

Hereditary Pancreatic Cancer

Hereditary Prostate Cancer

Lysosomal Storage Diseases

Muscular Dystrophy
