

# You're driven to make a difference

## OUR SOLUTIONS FOR ADVOCACY COMMUNITIES CAN HELP

Want to find and organize patients around the world? Build a community that learns together about their condition? Accelerate the search for cures in a way that puts patients' needs and privacy first?

### INVITAE IS DEDICATED TO HELPING ADVOCACY ORGANIZATIONS ACHIEVE THEIR GOALS

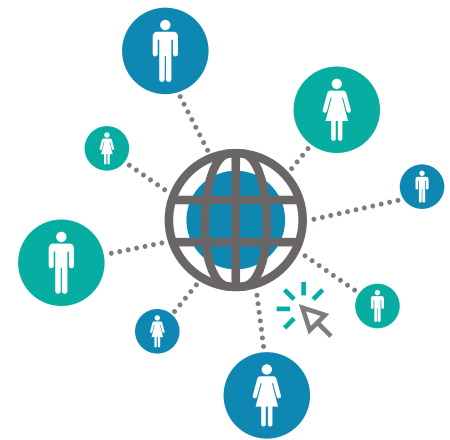

- We raise the visibility of a disease community by combining powerful genetic testing capabilities with our robust, secure Patient Insights Network (PIN) platform.
- Our advocacy partner program offers organizations the opportunity to brand a PIN for their cause at no charge.
- We work with biopharma companies to provide sponsored testing programs at no cost to patients and their families.

### HARNESS THE POWER OF A PATIENT INSIGHTS NETWORK

We believe that medical advances are made faster when data is shared and patients are in control of their health. Our engaged communities connect and empower patients while accelerating the search for new and better treatments.

Through a PIN, patients can securely contribute information about their personal experience with a disease, learn how others manage similar health journeys, and receive updates about the latest research and clinical trial opportunities, all the while keeping their privacy and identity protected. Participation is completely voluntary, genetic testing through Invitae is not required, and we will never share health information without permission.

The PIN network, which began as PatientCrossroads, securely houses and safeguards aggregated data for more than 400 medical conditions from more than 100 advocacy organizations.

### END THE DIAGNOSTIC ODYSSEY WITH GENETIC TESTING

Genetic testing can help more patients and families receive an accurate diagnosis, faster. Invitae offers one of the broadest genetic testing menus, including panel testing for more than 1,500 genes and the option to order an exome (spanning approximately 20,000 genes). In addition, when patients test positive, Invitae offers testing to first-degree relatives at no additional charge within 90 days of the original patient's test report date.

Explore Invitae's test catalog at [www.invitae.com/tests](http://www.invitae.com/tests).

### BYPASS BARRIERS BY BUILDING NO-COST TESTING PROGRAMS

We can improve the quality of healthcare for people in your communities by building novel partnerships between Invitae, biopharma companies, and advocacy organizations that engage clinicians and provide testing at no cost to patients and their families.
