

Invitae accepts preimplantation genetic testing for structural chromosome rearrangements/translocations (PGT-SR) on a case by case basis. This test evaluates samples for unbalanced structural chromosome rearrangements from known translocation carriers. This test also detects chromosomal aneuploidy (PGT-A/PGS). Please submit this form and any relevant test results by email to pgt@invitae.com or by fax to 415-276-4164.

ORGANIZATION INFORMATION			
Organization name			
Phone		Fax	
Address			City
State	ZIP code	Country	
Referring physician		Clinical contact	
Email address			

PATIENT INFORMATION			
Patient's last name	Patient's first name	Date of birth (MM/DD/YYYY)	Sex <input type="radio"/> F <input type="radio"/> M
Partner's last name	Partner's first name	Date of birth (MM/DD/YYYY)	Sex <input type="radio"/> F <input type="radio"/> M

CHROMOSOME TRANSLOCATIONS	
Maternal status: <input type="radio"/> Normal karyotype <input type="radio"/> Balanced chromosome rearrangement <input type="radio"/> N/A	Paternal status: <input type="radio"/> Normal karyotype <input type="radio"/> Balanced chromosome rearrangement <input type="radio"/> N/A
Karyotype _____	Karyotype _____

Once Invitae receives this form and required karyotypes, our medical team will review your referral and determine whether your patient is a candidate for PGT-SR within 1–2 business days.
