The Detect Cardiomyopathy and Arrhythmia offers no-charge genetic testing and counseling for people suspected of having a familial cardiomyopathy or arrhythmia.

Cardiomyopathies and arrhythmias may have a genetic cause that affects prognosis and management. The Invitae Detect Cardiomyopathy and Arrhythmia program was created to reduce barriers to genetic testing and improve clinical outcomes.

**CARDIOLOGY GENETIC TESTING CAN:**

- Confirm a clinical diagnosis and differentiate from other causes
- Provide accurate risk stratification
- Inform treatment decisions, guide lifestyle modifications, and facilitate genetic counseling
- Enable appropriate screening intervals of at-risk family members

**PROGRAM ELIGIBILITY**

Invitae Detect Cardiomyopathy and Arrhythmia is available to patients in the U.S. and Canada suspected of having a familial cardiomyopathy or arrhythmia.

**GENETIC COUNSELING WITH INVITAE**

Individuals tested through the Detect Cardiomyopathy and Arrhythmia program will be eligible for post-test genetic counseling to help them understand their test results.

**GENETIC TESTING**

The Detect Cardiomyopathy and Arrhythmia program offers the Invitae Arrhythmia and Cardiomyopathy Comprehensive Panel to test up to 150 genes associated with inherited arrhythmia and cardiomyopathy conditions.
